SUMMARY

Frontend-focused full stack developer with 2+ years shipping production React, Vue, and Next.js interfaces backed by Laravel APIs for Wings Group manufacturing plants. Sole engineer end-to-end — UI, API design, database schema, and deployment — replacing manual, paper-based workflows for 50–100 users per shift. Self-directed: scopes and ships features without a dedicated PM. Professional working English; open to async, distributed teams.

EXPERIENCE

Full Stack Developer · PT Adyabuana Persada (Milan Ceramic, Wings Group)

Nov 2024 – Present

Surabaya, Indonesia

- Replaced a week-long manual paper reporting process with the factory's first structured maintenance ticketing system — two mobile-first apps (Flutter, React Native) backed by React/Vue web dashboards — adopted by ~100 operators/shift and handling ~40 tickets/day.
- Sole full-stack engineer on both products: owned scoping, UI, REST APIs, mobile builds, and deployment end-to-end in 4 months, working directly with floor supervisors, management, and one SAP developer with no dedicated PM.
- Built role-based Laravel + React/Vue dashboards giving managers real-time visibility into ticket status, response times, and technician workload.

Full Stack Developer · PT Multipack Unggul (Wings Group)

Sep 2023 – Oct 2024

Surabaya, Indonesia

- Built the company's first unified ERP-style web app (Laravel + Vue.js + Socket.IO) in 4 months as sole engineer, replacing manual paper inventory counts and inter-department status calls with a real-time dashboard for ~50 users/shift.
- Designed inventory and production-planning UI around actual factory workflows from on-site analysis, cutting manual reconciliation and giving managers live stock and production visibility.
- Owned schema design, REST APIs, frontend implementation, deployment, and post-launch iteration alongside one SAP developer handling ERP integration.

SELECTED PROJECTS

- mrdev26.vercel.app — personal portfolio and sandbox showcasing full-stack builds across Laravel, Nuxt.js, React, and React Native.

- GitHub — <https://github.com/marcoruslie/signage-app>

EDUCATION

B.Sc. Informatics · Institut Sains dan Teknologi Terpadu Surabaya (ISTTS)

Aug 2020 – Dec 2024

LEADERSHIP

Vice President · Student Executive Board (BEM)

Jan 2023 – Jul 2024

- Coordinated cross-division programs and served as the primary communication link between divisions and leadership; drove decision-making on issues affecting student programs.

TECHNICAL SKILLS

Frontend: JavaScript (ES6+), TypeScript, React.js, Next.js, Vue.js, Nuxt.js, Tailwind CSS, responsive UI

Backend: PHP (Laravel), Node.js, MySQL, REST APIs, Socket.IO, authentication & role-based access

Mobile: React Native, Flutter

Tooling: Git, system analysis, requirements gathering, database design, deployment

Languages: Indonesian (native), English (professional working)
